

ANDREI LANCE TRIVIÑO

FRONTEND DEVELOPER

Batangas, Philippines • [(0961)-197-9052] • lancetrivino30@gmail.com • github.com/Lancetrivino • [LinkedIn](#)

SUMMARY

Frontend developer who builds fast, accessible, and polished web applications with React. Experienced in shipping production-ready apps end to end — from inventory systems to event platforms — using React, Supabase, and Vercel. Focused on clean code, intuitive interfaces, and solving real problems.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React, React Native, Tailwind CSS, Expo
- **Backend & Services:** Supabase, Firebase, Node.js, REST APIs, Vercel
- **Tools:** Git, GitHub, Vite, Figma, VS Code

PROJECTS

Alagad Carwash Inventory

React · Firebase · Tailwind CSS

- Built a full-featured inventory management system for a car wash & auto-detailing business, with authentication, product tracking, and operations management.
- Deployed a production-ready app on Vercel that streamlines day-to-day inventory and business operations.

StudySpot

React · JavaScript · CSS

- Developed a study-space discovery platform that helps students and professionals find and explore spaces suited to their needs.
- Designed a responsive, intuitive interface for browsing and filtering study locations.

Eventure

React · JavaScript · CSS

- Created a community event-management platform where organizers and attendees can plan, promote, and attend events — from car meets to workshops.
- Implemented event browsing and management features supporting a wide range of event types.

Job Finder App

React Native · Expo · JavaScript

- Built a cross-platform mobile app with React Native and Expo, delivering a consistent UI across Android and iOS.

EXPERIENCE

Freelance Frontend Developer — Personal & Client Projects 2026 – Present

- Build and ship full web applications independently — from inventory systems to event platforms — using React, Supabase, and Vercel.
- Deliver production-ready, responsive apps with a focus on clean code, performance, and accessibility.

Computer Science Student — De La Salle Lipa 2023 – 2026

- Build real-world applications, including StudySpot and Eventure, applying React and modern frontend practices alongside coursework.
- Participate in developer seminars and innovation challenges to stay current with industry tools and practices.

EDUCATION

Bachelor of Science in Computer Science — De La Salle Lipa Expected 2027

CERTIFICATIONS & SEMINARS

- Introduction to Data Science Using R Programming — *Eduonix Learning Solutions, 2026*
- Learning R Through an Example — *Eduonix Learning Solutions, 2026*
- Bridging Ethical Hacking and Data Analytics (Seminar) — *De La Salle Lipa, 2026*
- Hello World to the Real World: A Tech Industry Survival Guide (Seminar) — *De La Salle Lipa, 2026*
- Project DeepDive Session 2 — *ANIMO.DEV, De La Salle Lipa, 2026*
- CaLaBaRZon Young Innovators' Challenge (Participant) — *De La Salle Lipa, 2026*
